

Why Do More People Choose Maccor?

RAD Test Equipment - Reliable, Accurate, Dependable

Since 1986, the majority of all systems supplied by Maccor remain in every day, trouble free operation. Maccor equipment is more accurate than anything else you can buy. Year after year, research and industry have grown to depend on Maccor.

Superior Software

Maccor's software is based on over 100 man years of real world experience exceeding the testing requirements for Electrochemistry, Battery, and Energy Storage Devices.

Superior Hardware

Maccor's equipment is more accurate, faster, and out performs the competition. These capabilities will meet your present and future requirements!

World Wide Representation and Customer Support

Maccor has both sales and customer support in dozens of countries around the globe ready to assist you.

Backwards Compatible Software

Maccor's latest released software will run any Maccor supplied Windows based test system without the need of an expensive hardware upgrade.

Ease of Maintenance

Any position in a system can be easily calibrated without disturbing the other positions in the system. With a modular design and front and rear doors internal electronics are easily accessible during maintenance.

Telecomm Pulsing (GSM, CDMA, GPRS, etc.)

Systems can be specified with a few or all positions capable of simulating Telecomm and many other Pulse Load Profiles.

Field Upgradeable Systems

Maccor's modular design makes it simple to expand systems in the field minimizing downtime
